# TRA CLASSIFICATION OF OFF-THE-ROAD TIRES

## EARTHMOVER TIRES

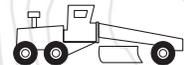

TRA Code	Tread Type	Yokohama Code	
		Radial	Bias
E-1	Rib Regular	RT31/RT31+, RB31, RL31 RB41, RB42, RT41, RL42, RL45	Y67, Y565 Y523, Y567
E-2	Traction Regular		
E-3	Rock Regular		
E-4	Rock Deep		
E-7	Flotation		

## LOADER AND DOZER TIRES

TRA Code	Tread Type	Yokohama Code	
		Radial	Bias
L-2	Traction Regular	RT31/RT31+, RB31 RT41, RL45 RL51, RL52 R69	Y103
L-3	Rock Regular		Y67, Y526, Y575
L-4	Rock Deep		Y67E, Y545
L-5	Rock Extra Deep		Y524, Y524Z, Y525
L-4S	Smooth Deep		Y69U
L-5S	Smooth Extra Deep		Y69, Y69K, Y69U

## GRADER TIRES

TRA Code	Tread Type	Yokohama Code	
		Radial	Bias
G-2	Traction Regular	RT21	Y103
G-3	Rock Regular		Y67

## INDUSTRIAL TIRES

TRA Code	Tread Type	Yokohama Code	
		Radial	Bias
IND-3, IND-3S IND-4, IND-4S IND-5, IND-5S	Traction Regular, Smooth Regular Deep, Smooth Deep Extra Deep, Smooth Extra Deep	RR41	Y20, Y67, Y69, Y69PS, Y573 Y523, Y69 Y69

## COMPACTOR TIRES

TRA Code	Tread Type	Yokohama Code	
		Radial	Bias
C-1	Smooth	N/A	N/A

## CRANE TIRES

TRA Code	Tread Type	Yokohama Code	
		Radial	Bias
---	---	RB01, RB03	N/A

**Caution:** Never replace a tire mounted on a vehicle with any tire designed for a different type of vehicle. For example, you should never place an earthmover tire on a loader.

# TIRES BY TYPE OF VEHICLE

**YOKOHAMA** off-the-road tires are classified by type of vehicle and application suitable for usage.

## DUMP TRUCKS

### (TRA Codes E-1, E-2, E-3, E-4 and E-7)

Dump trucks travel under heavy load at high speeds over relatively long distances. High heat, wear and cut resistance are all necessary requirements for dump trucks.

## SCRAPERS

### (TRA Code E-2, E-3, E-4 and E-7)

Scraper tires, of which the wide base type is most common, have the same properties as those for dump trucks with the addition of superior flotation and traction.

## FRONT-END LOADERS

### (TRA Codes L-2, L-3, L-4, L-5, L-4S and L-5S)

Front-end loaders operate on rough ground, cut and wear resistance are vital and the tires must provide stability for the loader body. Flotation and traction properties may also be necessary, depending on the working conditions. In certain cases, such as the wet and rough conditions of underground mines, the L-4S and L-5S with smooth treads are used because of their high wear and cut resistant properties.

## DOZERS

### (TRA Codes L-2, L-3, L-4 and L-5)

A dozer is used not only for dozing and leveling, but sometimes for pushing a motor scraper, tires with better traction than loader tires are necessary. Other requirements vary widely depending on job conditions.

## MOTOR GRADERS

### (TRA Codes G-1, G-2 and G-3)

The motor grader, which is used for road leveling, clearing and snow removal, needs tires that provide high traction and directional stability. Other characteristics depend on job requirements.

## INDUSTRIAL VEHICLES

### (TRA Codes IND-3, IND-4, IND-5, IND-3S, IND-4S and IND-5S)

Industrial service tires need to perform in a variety of service conditions, such as port and yard service, industrial vehicles range from forklifts to pot carriers to oil drilling platforms. These tires require extreme casing durability and outstanding tire life to perform in their harsh environments.

# TIRES BY TYPE OF VEHICLE

## TOWING TRACTORS

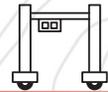

Towing tractors are used to move large aircraft and require high capacities and extra traction on cement or asphalt surfaces.

## STRADDLE CARRIERS

Straddle carriers are special vehicles that are mainly used in seaport areas to carry ocean going freight containers. These vehicles operate all day and are in constant operation which may require navigating sharp turns. These tires require extra heavy duty performance to handle heat buildup and high scrub wear.

## RUBBER TIRED GANTRY CRANES (RTG)

Rubber tired gantry cranes are special cranes mainly used to load and unload containers at seaport areas. These tires require abrasion resistance and durability.

## UNDERGROUND VEHICLES

Underground vehicles are used in underground mining operations. These tires need to be highly durable as well as highly resistant to cuts, punctures and snags, especially on the sidewalls.

## COMPACTORS

### (TRA Codes C-1)

Tire rollers use wide tread tires that uniformly distribute weight to compact road surfaces.

## MOBILE CRANES

Mobile cranes travel under heavy load at high speeds, thus these tires must have high speed durability and even wear.

Our radials are some of the toughest, longest lasting tires in the business. So no matter what kind of equipment you rely on most, you can count on Yokohama to keep them rolling.

**EARTHMOVER****RT31/RT31+ E-3**

- Extra large void-to-lug ratio, in combination with non-directional tread, enables greater traction in soft and muddy terrain.
- Enhanced tread compound provides outstanding wear, low heat generation and cut resistance.

**RB31 E-3**

- Tread designed with non-directional block pattern provides both abrasion resistance and excellent traction on soft surfaces.
- Buttress side protection and improved road stability.
- Low heat generation and flat base hexagon bead construction.

**RL31 E-3**

- Rock flush pattern provides excellent defense against cuts.
- Superior compounds generate longer life and fewer punctures.
- Sidewall construction built to handle cuts and snags.

**RT41 E-4**

- High turn-up carcass provides greater lateral stiffness and improved stability.
- Non-directional block pattern creates excellent traction.
- Buttress side protection for fewer sidewall snags and cuts.

**EARTHMOVER**

**RL45 E-4**

- Deep tread provides long life and enhanced stability.
- Compound provides low heat generation and cut resistance.
- Angled lugs promote long, even wear and improved traction.

**RB41 E-4**

- Non-directional block pattern provides both abrasion resistance and excellent traction on soft surfaces.
- Deep tread allows for maximum longevity.
- Enhanced durability with a built-in side protector.

**RB42 E-4**

- Zig-zag pattern provides excellent traction on muddy and rocky surfaces.
- Large center blocks resist cuts and enhance overall wear.
- Steel cord belts guard against tread punctures.

**RL42 E-4**

- Circumferential grooves dissipate heat for longer hauling capabilities.
- Directional tread pattern and deep, wide grooves expel mud and dirt for enhanced traction and stability.
- Buttress side protection defends the sidewall against cuts and snags.

**LOADER****RT31/RT31+ L-3**

- Extra large void-to-lug ratio and non-directional tread enables greater traction in soft and muddy terrain.
- Enhanced tread compound provides outstanding wear, low heat generation and cut resistance.

**RB31 L-3**

- Non-directional block pattern provides both abrasion resistance and excellent traction on soft surfaces.
- Flat base hexagon bead construction provides greater strength and combats rim slippage.
- Carcass construction protects against external damage and improves road stability.

**RT41 L-4**

- Belt package provides great durability and stability.
- High turn-up carcass provides greater lateral stiffness and improved road stability.
- Non-directional block pattern creates excellent traction.

**RL45 L-4**

- Deep tread depth enables longer wear and greater stability.
- Abrasion resistant non-directional block pattern offers reliable traction, side cut protection and better ride comfort.

**LOADER**

**RL51 L-5**

- Non-directional block pattern offers excellent traction, longer wear and cut resistance.
- Multi-layer, cross-ply steel belts promote durability and long-lasting performance.

**RL52 L-5**

- Unique cap compound yields superior cut resistance and longer wear.
- Flush tread pattern offers abrasion and cut resistance with a lower lug-to-void ratio.
- Buttress side protection helps prevent sidewall snags and cuts.

**GRADER**

**RT21 G-2**

- Designed with a self-cleaning non-directional block pattern.
- Good traction and flotation on soft and muddy surfaces.

**UNDERGROUND MINING**

**RT41 CPUG E-4**

- Unique compound and proven belt package provide greater durability and stability.
- High turn-up carcass provides greater lateral stiffness and improved road stability.
- Non-directional block pattern creates excellent traction.

**UNDERGROUND MINING****R69 L-5S**

- Advanced compounds improve durability by resisting heat build-up and fighting cuts and chips
- Durable belt package and enhanced compounds create extreme durability and a stable, square footprint
- High-angle sidewall decreases sidewall stress while providing added protection

**INDUSTRIAL****RR41 IND-4**

- Two main circumferential grooves provide excellent steering stability and improve vibration caused by tread design.
- Steel cord belting acts to guard against punctures.
- Specially designed for straddle carriers.

**CRANE****RB01**

- New tread pattern and rubber compound provide excellent performance, even wear and long tread life.
- Tough casing construction for lower fuel consumption, reduced tire noise, dependable stability and improved durability.

**RB01 Tube-Type**

- Engineered to lower fuel consumption.
- Tough casing construction enables enhanced durability.
- For use on wheel cranes and all-terrain cranes.

**RB03 Tube-Type**

- Specially designed tread pattern and compound provide excellent performance, even wear and long tread life.
- Tough casing construction and optimized rib pattern provide lower fuel consumption, reduced tire noise, better driving stability and improved high speed durability.

Yokohama offers the industry's largest selection of ultra-durable, long-lasting bias ply tires. From mine service to railyards, we've got you covered.

**EARTHMOVER****Y67 E-3 Tube-Type**

- Ideal for hauling over rock, coal and log-strewn terrain.
- Tough tread resists cuts and snags.
- Less heat buildup enables smoother running over longer distances.

**Y67 E-3**

- For hauling over rock, coal and log-strewn terrain.
- Tough tread offers resistance to cuts and snags.
- Less heat buildup enables smoother running over longer distances than deep tread tires.

**Y67 E-3 Special Application**

- Designed with a durable tread for tough terrain.
- Reduced heat build-up for enhanced reliability over long distances.

**Y565 E-3**

- Tough tread resists cuts and snags.
- Less heat buildup enables smoother running over longer distances than the deep tread.

**EARTHMOVER**

**Y523 E-4**

- Specially designed for dump truck use under highly abrasive conditions.
- Large ground contact area of the wide, deep double chevron uniform pattern provides good cut resistance and long service life.

**Y523 E-4 Special Application**

- For use on dump trucks in high-abrasion conditions.
- Uniform pattern provides good cut resistance and long service life.

**Y567 E-4**

- Advanced composition of enhanced tread compound provides outstanding wear, low heat generation and cut resistance.
- Specially designed for long-haul applications.

**LOADER****Y103** L-2

- Provides good traction and flotation on muddy ground.
- Directional tread pattern provides excellent self-cleaning properties.

**Y67** L-3

- Tough tread protects from cuts and snags.
- Wide ground contact area lengthens service life.

**Y526** L-3

- Unique symmetrical tread pattern and reinforced outer sidewall help prevent cuts.

**Y575** L-3

- Unique semi-level tread pattern with a large contact area for improved stability and longer service life.

**LOADER**

**Y67E L-4**

- Suited for loaders and dozers on rock, coal and log-strewn terrain.
- Deep tread provides good wear and cut resistance.

**Y545 L-4**

- Excels over rock, coal and log-strewn environments.
- Deep tread offers excellent wear with superb cut resistance.
- Steel belts in low aspect ratio tires provide enhanced protection against rock penetration for longer life cycles.

**Y524 L-5**

- Designed for loaders and dozers on rock, coal and log-strewn terrain.
- Unique profile with side protector for improved resistance to shoulder and sidewall cuts.

**Y524Z L-5**

- Ideal for rock, coal and ore mining environment.
- Half slick asymmetric tread pattern is specifically designed for superior tread and sidewall cut resistance.

**LOADER****Y69 L-5S**

- Deep tread and reinforced sidewalls offer superior resistance to damage and wear.

**Y69K L-5S**

- Modified sidewall profile for increased resistance to side wall damage.
- Extra-deep reinforced tread for longer treadwear and enhanced durability in extreme underground mining conditions.
- Specially formulated tread compounds extend treadlife.

**GRADER****Y103 G-2**

- Directional tread pattern provides excellent self-cleaning properties.
- Optimum traction and flotation on muddy surface.

**Y67 G-3**

- Tough tread prevents cuts and snags.
- Large ground contact provides long service life.

**UNDERGROUND MINING****Y20 IND-3**

- Tough tread protects against cuts and snags
- Wide ground contact area lengthens service life.
- New tread rubber compound provides outstanding wear and cut resistance.

**Y67 IND-3**

- Non-directional block pattern offers excellent traction, longer wear and cut resistance.
- Specially-designed high durable spec enables increased load capacity.
- Special compound generates less heat and provides additional scrub-resistance.
- Optimized rubber-to-void ratio provides better stability.

**Y67 E-3**

- Advanced composition provides exceptional cut and chip resistance producing outstanding wear and durability.
- Steel breaker construction provides extra case protection.
- Optimized rubber-to-void ratio enhances balance between cut-resistance and traction, increasing tread life and resilience.

**Y69 IND-3S/IND-4S**

- Optimized tread volume and ID specification handles heavier loads.
- Wider tread base provides better ground contact and stability.
- Special under-tread compounds and an over-ply casing resist heat generation.
- Deep tread and reinforced bead and sidewall increase durability in tough operations.

**UNDERGROUND MINING****Y69 L-5S/IND-5S**

- Deep tread and reinforced sidewalls offer superior resistance to damage and wear.

**Y69K L-5S**

- Modified sidewall profile for increased resistance to side wall damage.
- Extra-deep reinforced tread for longer treadwear and enhanced durability in mining conditions.
- Specially formulated tread compounds extend treadlife.

**Y69U L-4S/L-5S**

- Modified sidewall profile for increased resistance to side wall damage.
- Extra-deep reinforced tread for longer treadwear and enhanced durability in mining conditions.
- Specially formulated tread compounds extend treadlife.

**Y525 L-5 Tube-Type**

- Deep tread and reinforced sidewalls offer superior resistance to damage and wear.

**INDUSTRIAL**

**Y573 IND-3**

- Specially designed for towing tractors, this tire provides a combination of excellent wear resistance and outstanding traction.

**Y67 IND-3**

- Reinforced bead and sidewall area provide exceptional durability.
- Highly durable spec enables increased load capacity.
- Special compounding enables less heat generation and additional scrub resistance.
- Optimal rubber-to-void ratio provides better stability while deeper tread depths enhance traction.

**Y69PS IND-3S**

- Suited for vehicles such as straddle carriers, container handlers and towing tractors used at airports.
- Large tread width and ground contact area for good traction on paved surfaces.
- Compound specifically designed to resist wear in high-scrub applications.

**Y523 IND-4**

- Specially designed for use under highly abrasive conditions.
- Large ground contact area of wide, deep double chevron uniform pattern provides good cut resistance and long service life.

**INDUSTRIAL****Y69 IND-4S**

- Optimized tread volume and ID specification handles heavier loads.
- Wider tread base provides better ground contact and stability.
- Tread compound optimized for longer wear on concrete and asphalt surfaces.
- Special under-tread compounds and an over-ply casing resist heat generation.

**Y69K L-5S**

- Modified sidewall profile for increased resistance to side wall damage.
- Extra-deep reinforced tread for longer treadwear and enhanced durability in industrial conditions.
- Specially formulated tread compounds extend treadlife.

**Y69 L-5S**

- Optimized tread volume and ID spec handles heavier loads.
- Wider treadface provides better ground contact and stability.
- Compound is optimized for long wear on concrete and asphalt surfaces.
- Deep tread and reinforced bead and sidewall increase durability in tough operations.
