

MYX S01TM

RADIAL TIRE

FEATURES & BENEFITS

The MYX S01 all weather radial features an all steel radial casing, designed for graders, loaders and dozers. It provides excellent traction on snow and icy surfaces thanks to the advanced siping in the tread. The tire also features a non-directional block pattern and is abrasion resistant for longer service life and is dual marked G-2/L-2.

EXCEPTIONAL TRACTION IN SNOW AND ICE

Extensive tread siping provides multiple biting edges for exceptional traction in both snow and ice.

ADVANCED STRENGTH AND DURABILITY

Large hexagon bead bundle with optimized chafer design provides greater strength and added protection during install.

SIDEWALL STABILITY

High Turn-Up Construction for added lateral stiffness and improved road stability.

REDUCED OXIDATION

Increased inner liner gage reduces air loss in extreme temperature variations and aids in anti-oxidation.

VERSATILE MOUNTING

Non-directional tread provides versatility in mounting and rotating.
